

MB2 Lift & Rotate 19mm

The Lift & Rotate 19mm model is our newest product. It has the same footprint size as the standard version and even though the message screen is only 10cm larger compared to the standard model it is far superior due to the 19mm LED modules. With the Lift & Rotate 19mm you can fit more text on one screen than ever before and the graphics are more detailed due to the higher pixel rate.

LIFT & ROTATE 19mm:

up to 30 characters per line
and up to nine lines of text per page.

Character height from 9.5cm to 114cm

Able to withstand 80mph wind conditions

The LED boards used are the 19mm version, these are the brightest and widest lenses available

Radar control can be added to activate pre-programmed message

Ideal for A and B roads

Perfect for events

Highways England approved to TOPAS requirements

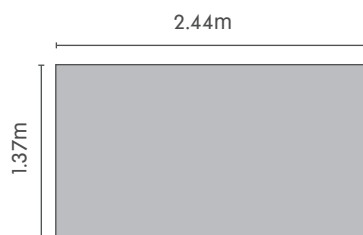

Remote controlled message changing from any computer with internet access

Footprint size:

2.74m length x 1.96m width
(3.90m with towing arm down)

MB2 Lift & Rotate Standard

LIFT & ROTATE STANDARD

The MB2 Lift & Rotate Standard is the medium size VMS in our range. The message screen is lifted into position by an electric linear actuator and can be turned through 360 degrees without having to move the trailer base, making it extremely easy to setup and get into position.

LIFT & ROTATE STANDARD:

up to 12 characters per line
and four lines of text per page.

Character height from 30cm to 96cm

Able to withstand 80mph wind
conditions

LED display, offering brightest and widest
angled lenses available

Radar control can be added to activate
pre-programmed message

Ideal for A and B roads

Perfect for events

Highways England approved to TOPAS
requirements

Remote controlled message changing
from any computer with internet access

Footprint size:

2.74m length x 1.96m width
(3.90m with towing arm down)
