

Solar CCTV

Our Solar CCTV units are a 24/7 continuous streaming solution. A perfect way to monitor traffic, roadwork sites and events, as well as providing security. Ideal for those remote areas where standard CCTV cannot be installed. They work hand in hand with our VMS and the footage can inform future decisions around traffic management.

- Camera mast rises up to 30 feet to give the best view and coverage
- Video streaming works over 3G/4G/LTE mobile network
- PTZ (pan, tilt, zoom) dome with Sony 22x autofocus lens/16x digital zoom
- 24/7 recording at location with remote playback. Up to 14 days recorded video
- Programme pre-sets to quickly take you to important areas/Views
- Vandal-resistant housing, clear bubble 110mm
- Live streaming and playback from web browser
- Multi-user logins available
- 24/7 solar powered with battery backup. No other power source required
- Footprint size: length 320cm x width 192cm
